

GIA ANN Architecture - Symbolic Core Development Specification 1d2b - 23 Oct 2017 - 01 Dec 2024

e.g. "the happy dog that ate the pie likes the bone near the house."

concepts: dog, pie, bone, house
inter-column (reference set delimiter) features;
actions (verbs): ate, likes
conditions (prepositions): near
intra-column features;
qualities (adverbs, adjectives): happy
etc.

Features are used to specify instances or specific concepts:
instances or specific concepts are defined by the activation of particular feature nodes in a concept column.

Nodes and connections will be temporary and/or weak if they are syntactically invalid.

Semantic concept columns
